

Goodwood: ESG-Conscious Investment-Grade Bonds

Updated: March 6, 2025

OBJECTIVE

The Goodwood environmental, social and (corporate) governance (“ESG”) conscious investment-grade bond mandate's objective is to preserve capital and generate income by investing in bonds with good relative ESG performance and attractive coupons. Goodwood uses a disciplined, fundamental approach to constructing investment-grade bond portfolios that they believe may reward investors with capital gains due to credit improvements and credit rating upgrades. The ESG-conscious strategy is diversified in position size, industry sectors and term-to-maturity. The mandate invests in approximately 30-40 fixed-income securities issued by companies that have achieved good scores in a third-party ESG valuation process; for safety, the mandate may also invest in Canadas or Provincials. The return target is 50-200 basis points over 5-year Canadas.

PORTFOLIO CONSTRUCTION

The Goodwood ESG-conscious investment-grade bond mandate is actively positioned within a portfolio of highly liquid issues, with an average yield-to-maturity expected to fluctuate between 3.5% and 5%, reflecting the manager’s assessment of risk-reward dynamics across the yield curve. Currently, the Manager has positioned the portfolio to be below market duration. Goodwood’s flexible, tactical approach allows the mandate to selectively extend or shorten duration exposure in the portfolio when appropriate to capitalize on inefficiencies in fixed-income markets. Issue selection is made from a universe of issuers who have achieved good scores in a third-party ESG evaluation process¹ and seek to offer products or services that are socially acceptable and support sustainable development and ethical business practices. The mandate seeks to avoid meaningful investment in companies whose business practices are believed to be directly contributing to an adverse societal impact on health (i.e. manufacture/distribution of tobacco, marijuana, alcohol), tools of war or violence, adult entertainment or gambling, broadcasting/publishing of deliberate misinformation, commonly held environmentally unsound practices consistently damaging the environment and issuers failing to satisfy or knowingly in breach of workplace health and safety standards.

The Goodwood ESG-conscious investment-grade bond mandate relies primarily on external ESG scoring methodologies and research to make assessments. All ESG Score data is collected from LSEG (formerly Refinitiv Eikon), a third-party source believed to be reliable, but the accuracy or completeness of the information is not guaranteed. The Portfolio ESG score is a quantitative measure, calculated as a weighted average of the available ESG score ratings for the underlying portfolio holdings as of March 6, 2025; and results may differ from time to time. As of March 6, 2025, 83.3% of the Goodwood ESG-Conscious Investment-Grade Bond mandate's holdings had available LSEG ESG scoring data and 16.7% of the holdings were invested in ESG bonds and/or certified green bonds. LSEG's ESG Scores measure a company's relative ESG performance based on company-reported data in the public domain across three (environmental, social and governance) pillars and ten ESG themes. The underlying measures are based on considerations around materiality, data availability and industry relevance. Other providers may also prepare ESG scores using their own methodologies, which may differ from the methodology used by LSEG.
